

The heatmap shows the relative importance of 1000 words across 1000 documents. The color scale ranges from dark purple (low importance) to light yellow (high importance). The highest importance is concentrated in the top-left corner, with a bright yellow square at (0,1) and a dark yellow square at (1,0). The importance generally decreases as the word index increases, with some scattered moderate importance (purple) in the middle rows.
